# BCSI'S Solution insures your video surveillance application doesn't become "End-Of-Life"

Dear Firstname Lastname,

The **Border Collie Systems™** Intelligent Network Video Recorder (INVR) offers the functionality of a digital video recorder combined with the intelligence of enterprise software in one central Interface. Designed for the security needs of residential, commercial and government facilities, BCSI's suite of software solutions deliver high quality video recording, viewing, and storage at affordable pricing levels. Software and hardware is upgradeable to maximize your investment. BCSI offers full remote viewing and control from any networked, web-enabled device (Internet Explorer or Mozilla). The easy-to-use interface offers many features such as multi-screen playback, and advanced search functions by event and object. PTZ Control, Scheduler, individually configurable motion detection, alarm detection, switch output and audio come standard. Link multiple BCSI systems with the SuperClient™ software for one easy-to-use centralized interface.

## \$150<sup>00</sup> Rebate!

Register now and receive a \$150 manufacturer's rebate off your next purchase of the Pro 1600!

“For over 2 years we have benefited from regular system updates that have added value to our initial offering. We are always heartened to see our investment keeping up with such an evolving technology and confident of our continued use of their systems.”

- Hugh Reynolds  
Video Shop Supervisor  
San Francisco Municipal Railway

## BCSI's features surpass the competition

Why is horsepower needed & what will the new BCSI mean to you and your customers?
